

Bytewave

Search page

- This is the main/index page of the app and also the search page.
- This page is used to find contracts.
- On the left we have options to limit your search to more specific listings.
- The middle of the page contains listings found by the search
- The preview button can be pressed to display information (on the right) about the contract and contractor without redirecting you to the contract page
- Clicking a contract listing brings you to that contract page

UCombinator

About Us: UCombinator is a fairly new product developed by two genuine programmers that helps the in-class experience when it comes to group projects. Not only does this company form groups that contain all skills needed to be successful in group work, they also have come out with a grading system that takes commits pushed to github as a groups submission.

Contract page

- This page displays information about a contract
- On the left it shows the title, contractor name, budget (how much the developer will be paid), deadline, description, required skills, and tags
- On the right it displays information about the contractor including a description, name, address, phone number, email and their contract posting history
- Also you may notice that the nav bar on this page contains the search bar. All pages except the search page have this and clicking home brings the user to the search page.

Create Contract page

- This form is used to create a new contract
- It reflects the format of the contract page (the title field is where the title will be, budget, deadline, description, etc.)
- The deadline field uses the bootstrap datepicker
- Information about the contractor is automatically filled in on the right side of the page

Public Profile page

- This page displays information about a developer
- This is what a contractor sees when looking for a developer
- On the left it shows useful information about the developer (rating, skills, experience, description)
- On the right it displays reviews that other contractors have given the developer. It also has a field so you can leave your own review of the developer
- On the bottom right of the page it displays information on how you can contact the developer

About me

Yo, yo, yo, please give me work.

Reviews

Angry Contractor
December 18th, 1998 12:22 PM
Hired this man for a quick, \$100 website fix. He deleted the entire html code for our website and replaced it with a picture of a squirrel which, when clicked, led to the lmgty page for "big man on campus". Would not recommend.

"Contractor"
